

# Castle Point District KSI data to end of 3<sup>rd</sup> quarter 2009 (Provisional)

## Total KSI casualties in Castle Point

**Figure 1.** Progress towards 2010 – Castle Point

- ◆ 1994 - 1998 baseline average.
- Number of KSI casualties per year since the 1994-1998 baseline average.
- Number of KSI casualties per year since the establishment of the PSA in 2004.
- Target. The 2010 target is a 40% reduction on the 1994-1998 baseline average. The line shows the level required to meet this

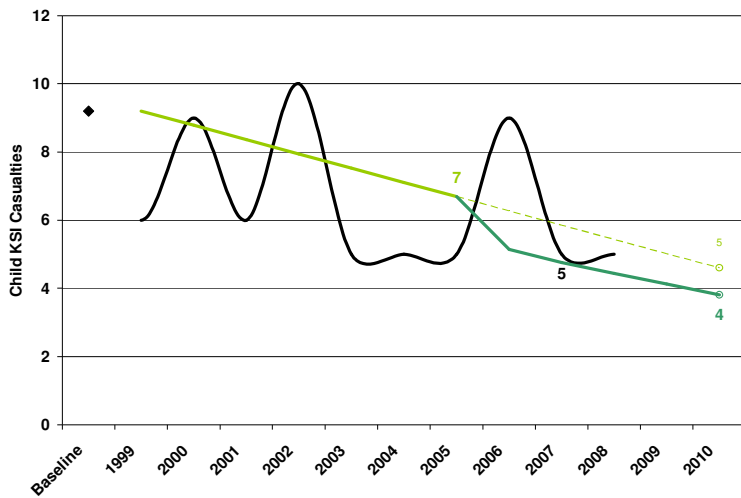

**Figure 2.** 2009 – Castle Point

- Cumulative KSI casualties. This shows the number of KSI casualties in 2009.
- Target. The target line shows the level required this year to be on target for 2010.
- Cumulative monthly progress in 2008.

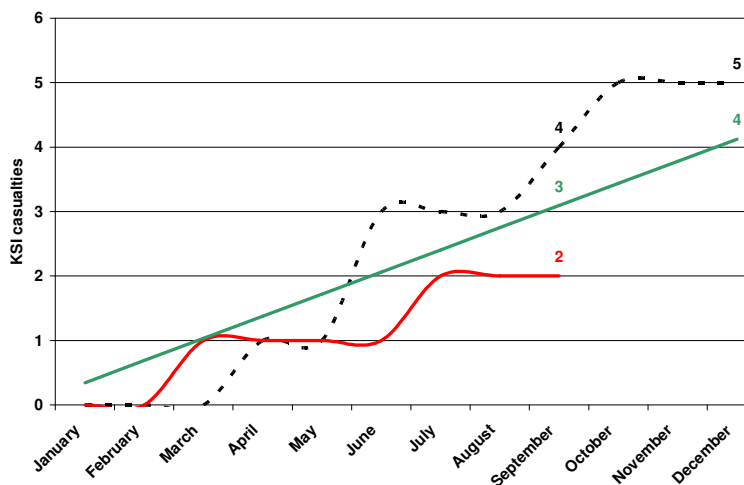

The number of KSI casualties in Castle Point has been mostly above the target line since the baseline period. In 2008 there were 41 KSI casualties, 2 more KSI casualties than in 2007 and 11 KSI casualties higher than the target line (figure 1). After the 3<sup>rd</sup> quarter of 2009 there have been 18 KSI casualties, 14 less than at the same stage of last year and 4 fewer than the target for this period (figure 2).

## Total CHILD KSI casualties in Castle Point

**Figure 3.** Progress towards 2010 – Castle Point

- ◆ 1994 - 1998 baseline average.
- Number of Child KSI casualties per year since the 1994-1998 baseline average.
- 2010 Target. The 2010 target is a 50% reduction on the 1994-1998 baseline average. The line shows the level required to meet this target.
- LTP2 Target. The LTP2 target was adjusted in 2005 to further reduce the DfT target.

**Figure 4.** 2009 – Castle Point

- Cumulative Child KSI casualties. This shows the number of KSI casualties in 2009.
- LTP2 Target. The target line shows the level required this year to be on target for 2010.
- Cumulative monthly progress in 2008.

Historically, the number of Child KSI casualties in Castle Point has fluctuated above and below the target line. In 2008 there were 5 child KSI casualties, equal to the number of child KSI casualties in 2007 and 1 higher than the adjusted target line (figure 3). After the 3<sup>rd</sup> quarter of 2009 there has been 2 Child KSI casualty, 2 fewer than at the same stage of last year and 1 less the target for this period (figure 4).

## Comparison with other districts

Castle Point was ranked 8<sup>th</sup> by number of KSI casualties in 2008 and 9<sup>th</sup> by KSI casualties per 100000 population (table 1). After the 3<sup>rd</sup> quarter of 2009 Castle Point was ranked 11<sup>th</sup> by number of KSI casualties and 10<sup>th</sup> by KSI casualties per 100000 population (table 2).

## Target groups

### Young Drivers

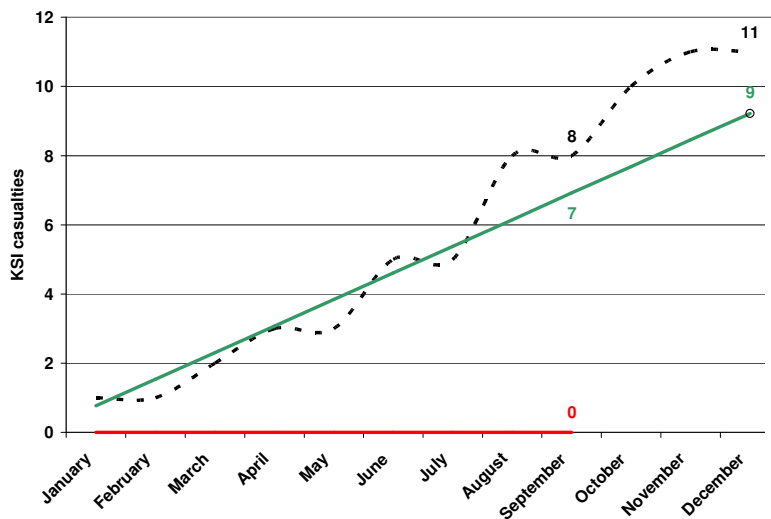

**Figure 5.** Progress towards 2010 – Castle Point – Young Drivers

◆ 1994 - 1998 baseline average.  
 — Number of KSI casualties per year since the 1994-1998 baseline average.

— Number of KSI casualties per year since the establishment of the PSA in 2004.

— Target. The 2010 target is a 40% reduction on the 1994-1998 baseline average. The line shows the level required to meet this

**Figure 6.** 2009 – Castle Point – Young Drivers

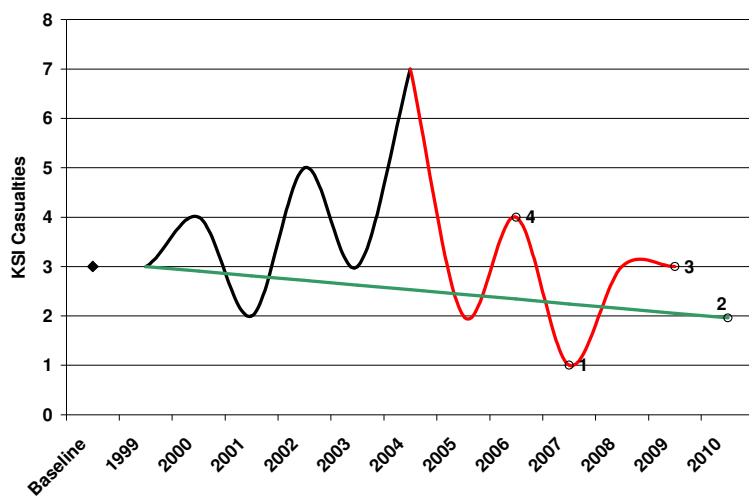

— Cumulative KSI casualties. This shows the number of KSI casualties in 2009.

— Target. The target line shows the level required this year to be on target for 2010.

--- Cumulative monthly progress in 2008.

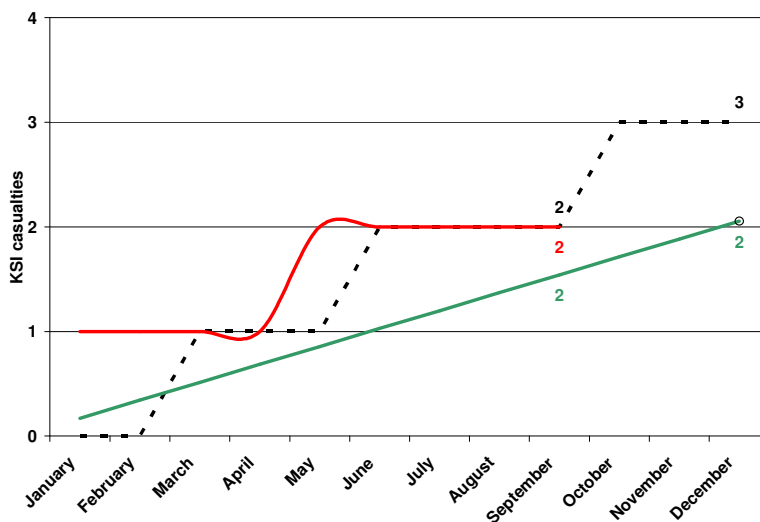

Young driver KSI casualties in Castle Point had been below the target line since 2003. In 2008, however, there were 11 KSI casualties, 4 KSI casualties more than in 2007 and now 1 higher than the target line (figure 5). After the 3<sup>rd</sup> quarter of 2009 there have been 0 young driver KSI casualties, 8 fewer than at the same stage of last year and 7 less than the target for this period (figure 6).

## Speed-related

**Figure 7.** Progress towards 2010 Castle Point – Speed-related

- ◆ 1994 - 1998 baseline average.
- Number of KSI casualties per year since the 1994-1998 baseline average.
- Number of KSI casualties per year since the establishment of the PSA in 2004.
- Target. The 2010 target is a 40% reduction on the 1994-1998 baseline average. The line shows the level required to meet this

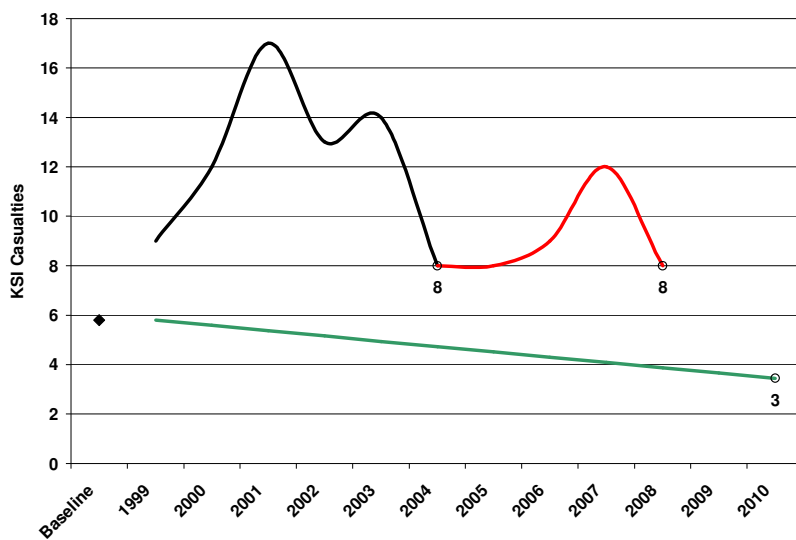

**Figure 8.** 2009 – Castle Point – Speed-related

- Cumulative KSI casualties. This shows the number of KSI casualties in 2009.
- Target. The target line shows the level required this year to be on target for 2010.
- Cumulative monthly progress in 2008.

Speed related KSI casualties in Castle Point have historically fluctuated above and below the target line. In 2008 there were 3 KSI casualties, 2 KSI casualties more than in 2007 and 1 higher than the target line (figures 7). After the 3<sup>rd</sup> quarter of 2009 there have been 2 speed related KSI casualties, equal to the same stage of last year and the target for this period (figure 8).

## Motorcyclists

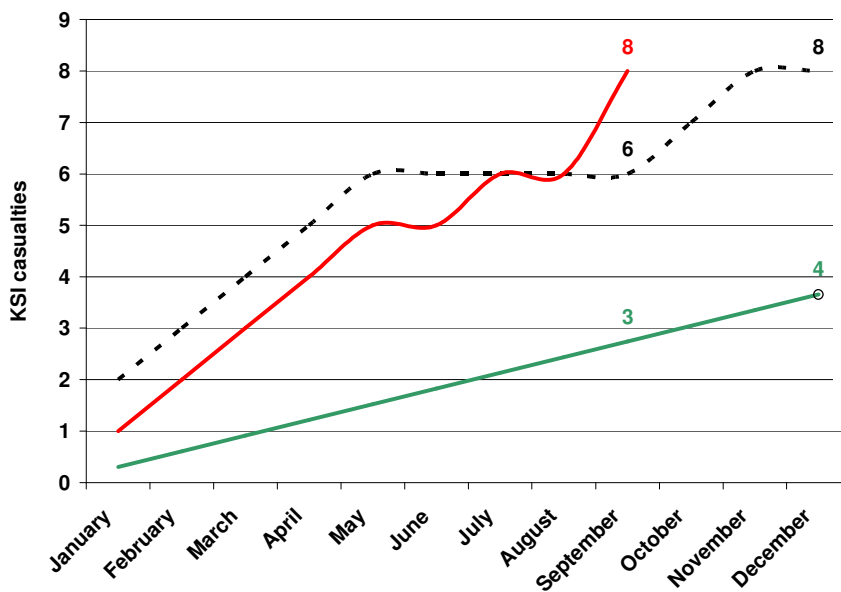

**Figure 9.** Progress towards 2010 – Castle Point – Motorcycles

◆ 1994 - 1998 baseline average.  
 — Number of KSI casualties per year since the 1994-1998 baseline average.

— Number of KSI casualties per year since the establishment of the PSA in 2004.

— Target. The 2010 target is a 40% reduction on the 1994-1998 baseline average. The line shows the level required to meet this

**Figure 10.** 2009 – Castle Point – Motorcycles

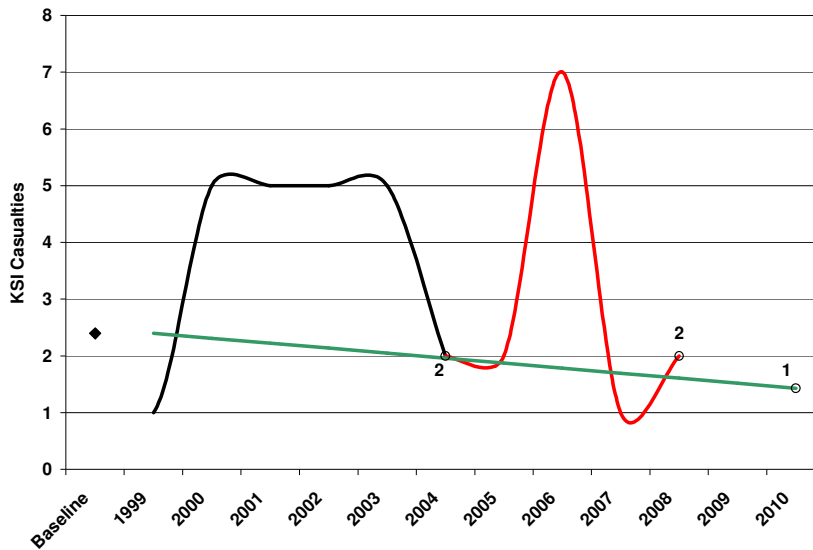

— Cumulative KSI casualties. This shows the number of KSI casualties in 2009.

— Target. The target line shows the level required this year to be on target for 2010.

--- Cumulative monthly progress in 2008.

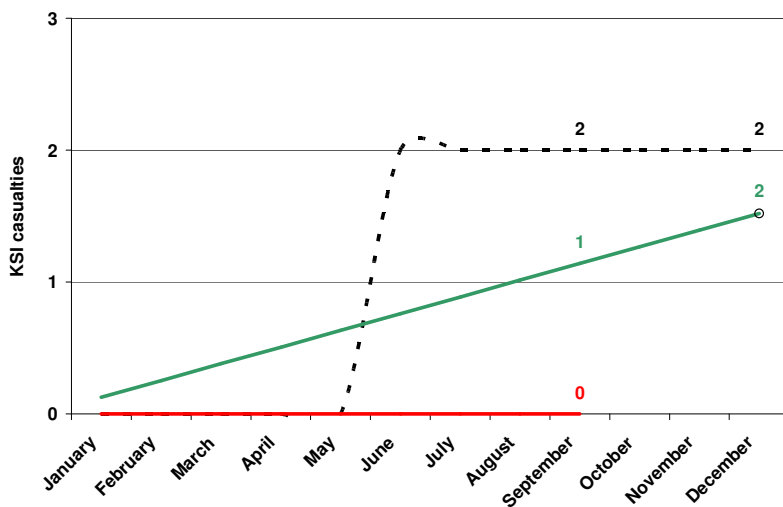

Motorcycle KSI casualties in Castle Point have historically been above the target line since the baseline average and have been increasing since 2004. In 2008 there were 8 KSI casualties, 4 KSI casualties fewer than in 2007 but still 4 higher than the target line (figure 9). After the 3<sup>rd</sup> quarter of 2009 there have been 8 motorcycle KSI casualties, 2 more than at the same stage of last year and 5 more than the target for this period (figure 10).

## Drink Drive

**Figure 11.** Progress towards 2010 – Castle Point – Drink Drive

- ◆ 1994 - 1998 baseline average.
- Number of KSI casualties per year since the 1994-1998 baseline average.
- Number of KSI casualties per year since the establishment of the PSA in 2004.
- Target. The 2010 target is a 40% reduction on the 1994-1998 baseline average. The line shows the level required to meet this

**Figure 12.** 2009 – Castle Point – Drink drive

- Cumulative KSI casualties. This shows the number of KSI casualties in 2009.
- Target. The target line shows the level required this year to be on target for 2010.
- Cumulative monthly progress in 2008.

Historically, drink drive KSI casualties have rarely been below the baseline target in Castle Point. In 2008 there were 2 KSI casualties, 1 more than in 2007 and equal to the end of year target (figure 11). After the 3<sup>rd</sup> quarter of 2009 there have been 0 drink drive KSI casualties, 2 fewer than at the same stage of last year and 1 less than the target for this period (figure 12).
